The Village of Vaujany : authentic and modern

Facing the superb Grandes Rousses, at 1250m altitude, Vaujany has all the charm and warmth of an authentic family-oriented village of mountain.

Its architecture reflects its history whose first remains date back to the year 1080. This small agricultural village developed around the land cultivation and animal husbandry. When you walk in the streets of the village, you will discover the charm of old vaulted stables built of stone, old wooden barns to house hay harvest, the village square, its fountains, its church and its Millennium bel tower.

Between tradition and modernity, Vaujany offers the most efficient equipment for skiing, skating and trekking in the heart of landscapes, in a smiling and preserved nature.
